The Home Germs Formula

« Most commercially available air fresheners simply add an artificial scent to odors already present in the room.

A few sprayings of a blend of essential oils with strong antiseptic powers will allow you to get rid of bacteria which are causing these odors.»

Ingredients : Essential Oils of Cinnamon, Clove, Eucalyptus, Grapefruit, Lavender, Lemon, Lemongrass, Lime, Niaouli, Pine, Thyme.

Home Germs Formula

Essential Oils : Cinnamon, Clove, Eucalyptus, Grapefruit, Lavender, Lemon, Lemongrass, Lime, Niaouli, Pine, Thyme

Presentation : 10, 15, 20, 30, 50 and 100 ml glass bottles.

Shelf Life : needs to remain tightly closed and stored away from light and heat. Best if used within 3 years after the manufacturing date printed on the label.

Instructions:

For **surfaces**, by pouring a few drops of the undiluted formula directly on a sponge, or by diluting it in a liquid soap that you use for your housekeeping (about **5 ml** to 1 liter of soap), for cleaning your floors, sinks, garbage cans, pet litter boxes, etc.

As an **air sanitizer**, using a diffuser such as an oil warmer, or an electric diffuser sold for Aromatherapy, or the receptacle provided for this purpose of some electric humidifiers, or an air humidifier placed between the blades of a central heating radiator. Use **ten to twenty drops** of the formula, depending on the duration, for each of those methods.

To vaporize or spray, use the following dosage:

- **15 drops** of the Home Germs Formula, to dilute in,
- **60 ml** (4 tbsp.) of alcohol, to dilute in,
- **2 liters** of water.

Be sure to follow each of those preparation steps, ensuring good dispersion of essential oils in your final blend. Agitate the container before each use. This spray can be used for light spraying in all the rooms, or localized spraying, focused on particular spots.

Frequency of use:

Know that the essential oils you spread have a lasting residual effect: they are active

immediately, and for several weeks. However, if you treat rooms you constantly ventilate, think of treating these rooms more frequently.

In local applications, such as sinks, floors, garbage cans, cat litter boxes, renewing them on a weekly, or even monthly, basis should be appropriate.

Precautions:

Concentrated or diluted product: do not ingest. Avoid contact with eyes and mucous membranes. Keep out of the reach of children.

Tips about « sprays »:

There are two ways to make sprays with essential oils. Read carefully.

Sprays made with alcohol: the first step consists in thoroughly diluting the essential oils in pure alcohol, bought in pharmacy, or drugstore. The second step consists in adding this blend in the water contained in your vaporizer. Shake well. You do not have to use the vaporizer's content all at once. It can be stored, but you need to remember to shake the bottle before each use.

Sprays made without alcohol: for single use only, you can prepare a spray with warm water, not boiling, in which you pour your essential oils. It is very important that you shake your container before and during use.

Caution:

Avoid spraying your preparation in the direction of another person or pet. Alcohol and certain essential oils are irritants.

Do not spray your essential oils towards a flame, especially if you used alcohol for their dilution.

Do not spray your essential oils on your food, or on pet food.

Avoid spraying water on wooden furniture, waxed, polished wood, etc. to avoid stains. If you often spray essential oils in your home, it is best to use distilled water or demineralized water, so as not to leave marks on your furniture, curtains, floors.
