The Home Insects Formula

« A complete blend of essential oils will help you in the fight against any kind of insect, crawling or flying, in your home. It is also effective against mites and other acarids.

Of a safe and easy use, these oils will quickly replace your chemical insecticides without their harmful side effects. »

Home Insects Formula
Essential Oils : Cedarwood, Citronella, Eucalyptus, Lavender, Pine, Orange, Peppermint, Sage, Tea

Ingredients : Essential Oils of Cedarwood, Citronella, Eucalyptus, Lavender, Lemongrass, Peppermint, Pine, Rosemary, Sage, Sweet Orange, Tea Tree.

Presentation : 10, 15, 20, 30, 50 and 100 ml glass bottles.

Shelf Life : needs to remain tightly closed and stored away from light and heat. Best if used within 3 years after the manufacturing date printed on the label.

Instructions:

It is important to think about your strategy before choosing how to use this formula. It is best to understand the behavior of the Insects and then block their access to your home. Some crawling insects such as ants, bedbugs, woodlice and cockroaches, require a focused action, aimed at the paths they travel, as flying insects, flies, mosquitoes, wasps, hornets, as well as mites, acarids and spiders rather require that you treat all of your rooms.

- In **spray**, proceed as follows:
 - **15 drops** of the Home Insects Formula, to dilute in,
 - **60 ml** (4 tbsp.) of alcohol, to dilute in,
 - **2 liters** of water.

Be sure to follow each of those preparation steps, ensuring good dispersion of essential oils in your final blend. Agitate the container before each use.

This spray can be used for light spraying in all the rooms, or localized actions, focused on paths of colonies of crawling insects, but also around your doors and windows, entry points of many flying insects. This mixture can also be used to treat wood against termites, or other insects living off wood.

. With a **diffuser** , such as an oil warmer, or an electric diffuser sold for Aromatherapy, or the receptacle provided for this purpose of some electric humidifiers,

or an air humidifier placed between the blades of a central heating radiator. Use **ten to twenty drops** of the formula, depending on the duration, for each of those methods

Frequency of use:

Know that the essential oils you spread have a lasting residual effect: they are active immediately, and for several weeks. However, if you treat rooms you constantly ventilate, think of treating these rooms more frequently. Regarding local spraying, on frames of doors and windows, or following the paths taken by ants or cockroaches, the frequency of once a month is enough, usually. This can vary depending on the number of insects, the weather, etc.

Precautions:

Concentrated or diluted product: do not ingest. Avoid contact with eyes and mucous membranes. Keep out of the reach of children.

Tips about « sprays »:

There are two ways to make sprays with essential oils. Read carefully.

Sprays made with alcohol: the first step consists in thoroughly diluting the essential oils in pure alcohol, bought in pharmacy, or drugstore. The second step consists in adding this blend in the water contained in your vaporizer. Shake well. You do not have to use the vaporizer's content all at once. It can be stored, but you need to remember to shake the bottle before each use.

Sprays made without alcohol: for single use only, you can prepare a spray with warm water, not boiling, in which you pour your essential oils. It is very important that you shake your container before and during use.

Caution:

Avoid spraying your preparation in the direction of another person or pet. Alcohol and certain essential oils are irritants.

Do not spray your essential oils towards a flame, especially if you used alcohol for their dilution.

Do not spray your essential oils on your food, or on pet food.

Avoid spraying water on wooden furniture, waxed, polished wood, etc. to avoid stains. If you often spray essential oils in your home, it is best to use distilled water or demineralized water, so as not to leave marks on your furniture, curtains, floors.
